Hüseyin Bor , On certain new applications of quasi-power increasing sequences.....1	1
John N. Haddad , Ziad S. Rached, Amer F. Jajou , The Full Likelihood Function of a Linear Stationary Gaussian Process.....9	9
Sudaporn Suebsung, Ronnason Chinram , Interval Valued Fuzzy Ideal Extensions of Ternary Semigroups.....15	15
Bahattin Gunes , The imaginary parts of the zeros of the Riemann zeta function.....29	29
M. H. Hooshmand, H. Kamarulhaili , A recurrence equation for b -digital sequences and its solutions.....37	37
H. N. ÖZGEN , On Two Integrability Methods of Improper Integrals.....45	45
Khwancheewa Wattanatripop, Ronnason Chinram, Thawhat Changphas , Fuzzy almost bi-ideals in semigroups.....51	51
Emil Asmaryan , On the Generation of Pythagorean Triples and Representation of Integers as a Difference of Two squares.....59	59
Ahmet Karakaş , A note on absolute summability method involving almost increasing and δ -quasi-monotone sequences.....73	73
Badih Ghusayni , Favorite mathematics topics from the 12 th Century to the 21 st Century.....83	83
Vagner Jikia, Ilia Lomidze , New properties of Special Functions and applications.....105	105
Umer Shuaib, Muhammad Shaheryar, Waseem Asghar , On Some Characterizations of α -fuzzy subgroups.....119	119
Armend Salihu , A modern modification of Gjonbalaj-Salihu cornice determinant, transformation to semi-diagonal determinant.....133	133
Warud Nakkhasen, Bundit Pibaljomme , Intuitionistic Fuzzy k - Γ -Hyperideals of Γ –Semihyperrings.....139	139
S. M. Abrarov, B. M. Quine , Efficient computation of pi by the Newton--Raphson iteration and a two-term Machin-like formula.....157	157
Uzoamaka A. Ezeafulukwe, Maslina Darus, Olubunmi Abidemi Fadipe-Joseph , On Analytic Properties of a Sigmoid Function.....171	171
John Patrick Fulgencio Solano, Sudaporn Suebsung, Ronnason Chinram , On ideals of fuzzy points n -ary semigroups.....179	179
Rabah Kellil , Sum and product of Fuzzy ideals of a ring.....187	187
Garima Sharma, Amit B. Singh , Strongly r -Clean Rings.....207	207
Andreas Boukas , Picard Approximation of the Matrix Elements of Quantum Stochastic Differential Equations and Quantum Flows and Basic Error Estimates..215	215
Emel Biçer, Cemil Tunç , New Theorems for <u>Hyers-Ulam</u> Stability of <u>Lienard</u> Equation with Variable Time Lags.....231	231
